

# Minimal Pairs Production: Liquids and Glides

W/L & W/R

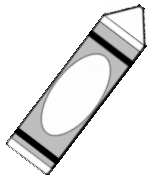

Created by: Sue Blankenship  
Graphics by: My Cute Graphics

## Contents:

- 10 W/L minimal pair strips with word & picture stimuli
- 10 W/R minimal pair strips with word & picture stimuli

## Directions:

- Print, laminate, and cut apart strips on lines.
- Present a strip of minimal paired words to the student and have him read each word on the strip. Remind him to think about and feel what his tongue and lips are doing to make the sounds in the words.
- Have the student read a strip three times for more practice. Have them say the words slowly at first; as they become more proficient, have them say the minimal pairs faster to increase automaticity of productions.
- You can also have the student use the "L" or "R" word at the end of the row in a sentence.
